

Join The National Association For Biomedical Research Today!

Founded in 1979, the National Association for Biomedical Research (NABR) provides the unified voice for the scientific community on legislative and regulatory matters affecting laboratory animal research. NABR works to safeguard the future of biomedical research on behalf of its more than 300 public and private universities, medical and veterinary schools, teaching hospitals, voluntary health agencies, professional societies, pharmaceutical and biotechnology industries, and other animal research-related firms.

Membership Community

Once you join NABR you will be in good company. Every major pharmaceutical company, 80% of medical schools, nearly every veterinary medical school, and nearly every research university are NABR members.

Your Voice in Washington

NABR advocates on behalf of its members at all levels of the federal government: Congress, the USDA, NIH, FDA, CDC and the White House. NABR communicates the essential role of animals in research by encouraging supportive legislation, providing comments on pending proposals, presenting testimony at Congressional hearings, and serving as an information source for Congressional staff and constituents.

Publications

- *Crisis Management Guide* - NABR's Crisis Management Guide is the research community's most comprehensive guide for dealing with animal rights activism.
- *NABR Update* – NABR's bi-weekly publication containing public policy news, information on state legislative proposals, digests of upcoming animal rights activity nationwide, and a calendar of related events.
- *NABR Alerts* – Specialized notifications designed to call the biomedical research community to action when necessary.

Crisis Management Support

Drawing on more than 30 years of experience, NABR provides unparalleled crisis management support. NABR provides its members and subscribers with planning advice, coordination and emergency support in times of crisis.

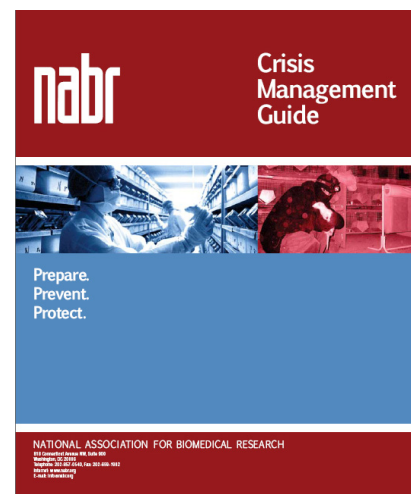

What our Members are saying:

“During our recent challenges we were grateful to have one constant – the reliable, experienced assistance from NABR. Thanks to your professionalism and insight, we were able to weather this tumultuous storm.”

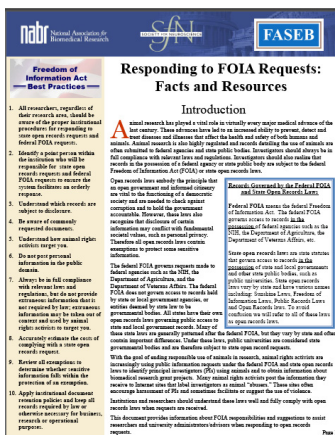

- ❖ Executive Vice Chancellor and Dean,
School of Medicine

“NABR's Webinars are by far the most useful sessions I've run across, and the lack of registration fees for member institutions ensures that the information can continue to be disseminated to the AC&U community despite severe cutbacks in staffing and funding.”

- ❖ IACUC Program Manger

NABR's Crisis Management Guide is the research community's most comprehensive guide for dealing with animal rights activism.

NABR proactively responds to legal challenges faced by the biomedical research community. Our recently released ten-point best practices guide *Responding to FOIA Requests: Facts and Resources* assists members in appropriately responding to FOIA and state open records requests.

Legislative Success

NABR was instrumental in securing the passage of the Animal Enterprise Terrorism Act, a federal law providing greater protection for the biomedical research community and their families against intimidation and harassment by animal rights extremists. NABR closely monitors both federal and state legislation and provides timely alerts to our members when action is needed.

Join NABR Today!

By joining NABR your organization will align its interest with the larger scientific community to promote the advancement of sound public policy. Your membership will enable NABR to continue to safeguard the future of responsible and necessary biomedical research. To obtain a membership application, please call NABR at (202)-857-0540, email us at info@nabr.org or visit our website, www.nabr.org.

Webinars and Training Opportunities

With membership, your institution will receive complimentary access to our quarterly webinars along with a host of other services and educational opportunities. Recent and planned webinars include:

- ✓ The Eighth Edition of the *Guide for the Care and Use of Laboratory Animals: What's New and What Does it Mean*
- ✓ Surviving the Age of Enforcement
- ✓ Planning Your Institutional Response to Animal Rights Activists
- ✓ Are You FOIA Ready?
- ✓ A Guided Tour of USDA's Inspection Guide
- ✓ Managing the USDA Inspections Process
- ✓ Are You Sure You're Filing Your USDA Annual Reports Properly?

Insightful Analysis

NABR provides its members with thorough analysis of regulatory and legislative proposals, legal decisions and other items of consequence to the biomedical research community.

Members Only Website

Individuals at NABR member institutions are provided access to the NABR Members Only section of our website. The Members Only section contains recordings of NABR webinars, archives of the *NABR Update*, FOIA and state open records law resources, tools and tips for communicating with Congress, a state laws database and a member resource center containing a broad array of useful fact sheets, publications and research tools.
